

## Year 5 – Science - Spring 2 - Biology

# Living things and their habitats

### We are learning about:

- **the life cycles of different animals** (describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird)
- **how some plants and animals reproduce** (describe the life process of reproduction in some plants, name, locate and describe the functions of the main parts of plants, including those in the reproductive system, describe the reproductive process in some animals)

### We are learning to:

- **plan an enquiry** (to be able to plan the correct type of enquiry to answer a question, to be able to recognise which secondary sources will be most useful to their research (non-statutory))
- **record my results** (to be able to use scientific diagrams and labels)
- **use my results to draw conclusions** (to be able to explain findings to be able to give reasons, based on evidence)

### Key vocabulary

life cycle

mammal

amphibian

reproduction
