

# Year 6 Science – Autumn 1 **Biology**

## Living things and their habitats

### We are learning about:

- **how living things can be grouped** (describe how living things are classified into broad groups according to common observable characteristics and based on similarities and differences, including micro-organisms, plants and animals)
- **the reasons why they are grouped together** (give reasons for classifying plants and animals based on specific characteristics)

### We are learning to:

- **make and use scientific keys** (be able to make a key to classify plants)
- **use my results and observations to answer questions** (to be able to identify scientific evidence that has been used to support or refute ideas or arguments)

### Vocabulary

Classification – classified  
Similarities and differences  
Characteristics  
Micro-organisms  
Plants  
Animals
